RETAIL DISPENSER

THE SMART STORAGE SYSTEM FOR TOBACCONISTS

GM.
GLOBAL SOLUTIONS

THE RETAIL DISPENSER RANGE
THE SMART CIGARETTE STORE

An automated cigarette dispensing solution, offering security, control, high capacity, speed, time saving and management, and a modern, up-to-date image of the shop.

Security and control

- The cigarettes are protected in a vandal-proof metal cabinet with a security lock (making theft difficult).
- Control of stock and each cigarette sale.
- Solution for new packaging (to avoid confusion).

Modern image and versatility

The tobacconist shop will present a modern, tidy image, accompanied by product display and advertising screens.

- Designed for installation in existing stores and shops
- Each dispenser can be simultaneously controlled from various stations or points of sale.
- Large product retrieval area with LED lighting, designed to retrieve one or more packets.
- Doors incorporating shelving for a LED back-lit product display.
- The dispenser door can incorporate a 40" advertising screen.

High capacity and speed of service

- Large capacity and space optimisation
- Flexible interior configuration (different capacity and size channels) and for different packaging types.
- Fast and easy to use. 60 packets per minute.
- Multi-sale: Dispensing more than one packet per sale.

FLEXIBLE CHANNEL CONFIGURATION (FORMATS & CAPACITIES)

HIGH CAPACITY

LED LIGHTING

DIFFERENT DISPENSING CONTROL OPTIONS (TABLET, POS INTEGRATION)

SUPER KING CHANNELS

TELEMETRY CONNECTION WITH GMBOS

40" DOOR-INTEGRATED ADVERTISING SCREEN

GM
GLOBAL SOLUTIONS

GMBOS
Telemetrics

The GMBOS telemetry system makes it possible to remotely manage each machine:

- Machine configuration:
  - Connection of pushbuttons with channels.
  - Up-dating of screens and products.
  - Price changes.
  - Screen advertisement management.
- Control of cigarette inventory and sales per product: for the optimized management of cigarette purchases.
- Alerts: the software allows a number of alerts to be configured, relating to the stock and the technical activity of the machine.

Different dispensing control options
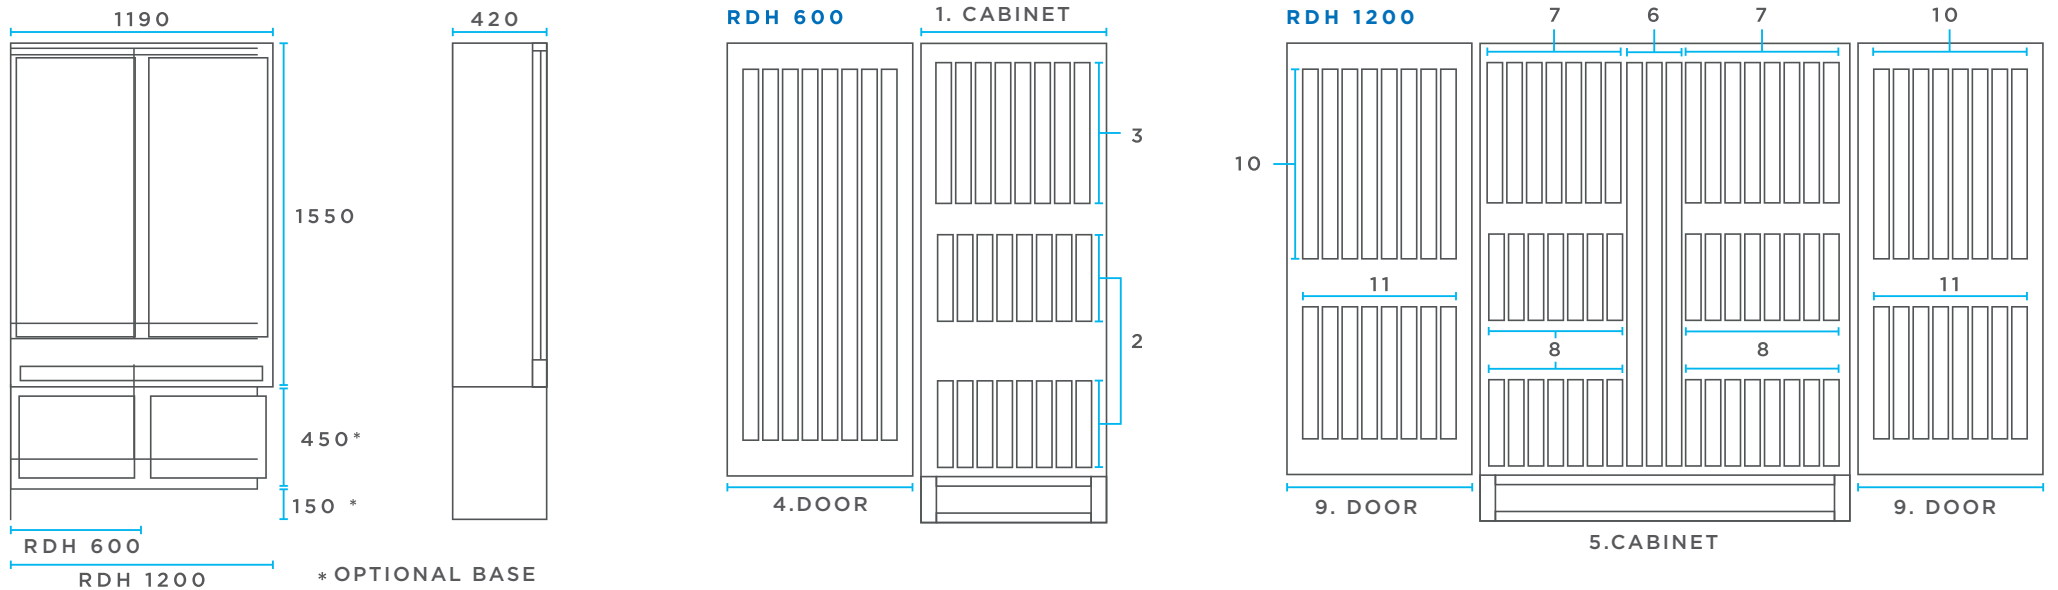

Managed from a tablet

Integrated with the ERP of the counter POS.

The machine can be integrated with the shop management system, so that the selection will be made from the POS itself, deducting the sales from the cigarette inventory.
